Integrator's test with my server

My webhook data as a exposee

```
Webhook data: [  
  {  
    eventType: 'message sent',  
    callbackURL: 'http://example.com/message-sent-webhook'  
  },  
  {  
    eventType: 'message received',  
    callbackURL: 'http://example.com/message-received-webhook'  
  },  
]
```

My server gets notification that i get a http request

```
Forwarding HTTP traffic from https://alex.serveo.net  
HTTP request from 87.52.108.6 to https://alex.serveo.net/webhooks/register
```

Integrators output:

```
Server is running on localhost:8080  
Webhook registered successfully: webhook for message received registered successfully.
```

Integrators guide

Insert public url in your system.
